Invited Paper Foreword

The Invited Article section of this issue contains “Server PIR with Subpolynomial Communication” by Sivakanth Gopi and Zeev Dvir, which won the best paper award at the 47th ACM Symposium on the Theory of Computing (STOC’15), held in Portland, OR, June 15 to 17, 2015. I thank the STOC 2015 Program Committee for their help in selecting this invited article.
