Invited Articles Foreword

The Invited Article section of this issue consists of two articles. The article “Monadic Decomposition” by Margus Veanes, Nikolaj Bjørner, Lev Nachmanson, and Sergey Bereg won a Best Paper Award at the 26th International Conference on Computer Aided Verification Computing (CAV’14). The article “Verifying Increasingly Expressive Temporal Logics for Infinite-State Systems” by Byron Cook, Heidi Khlaaf, and Nir Piterman won a Best Paper Award at the 27th International Conference on Computer Aided Verification Computing (CAV’15). We want to thank the CAV’14 and CAV’15 Program Committees for their help in selecting these invited articles.
