Editorial: Updates to the Editorial Board

It is of paramount importance for a scholarly journal such as *ACM Transactions on Database Systems* to have a strong editorial board of respected, world-class scholars. The editorial board plays a fundamental role in attracting the best submissions, ensuring insightful and timely handling of submissions, maintaining the high scientific standards of the journal, and maintaining the reputation of the journal. Indeed, the journal's Associate Editors, along with the reviewers and authors they work with, are the primary reason that *TODS* is a world-class journal.

As of January 1, 2018, five Associate Editors—Walid Aref, Graham Cormode, Gautam Das, Sabrina De Capitani di Vimercati, and Dirk Van Gucht—ended their terms, each having served on the editorial board for six years. In addition, they will stay on until they complete their current assignments.

Walid, Graham, Gautam, Sabrina, and Dirk have provided very substantial, high-caliber service to the journal and the database community. Specifically, they have lent their extensive experience, deep insight, and sound technical judgment to the journal. I have never seen them compromise on quality when handling submissions. Surely, they have had many other demands on their time, many of which are better paid, during these past six years. We are all fortunate that they have donated their time and unique expertise to the journal and our community during half a dozen years. They deserve our recognition for their commitment to the scientific enterprise.

As of January 1, 2018, five Associate Editors have joined the editorial board:

- Angela Bonifati, Université Claude Bernard Lyon 1 (<http://liris.cnrs.fr/angela.bonifati>)
- Wolfgang Lehner, TU Dresden (<https://www.db.inf.tu-dresden.de/our-group/team/wolfgang-lehner/>)
- Dan Olteanu, University of Oxford (<http://www.cs.ox.ac.uk/dan.olteanu>)
- Evaggelia Pitoura, University of Ioannina (<http://www.cs.uoi.gr/~pitoura>)
- Bernhard Seeger, University of Marburg (<https://www.uni-marburg.de/fb12/arbeitsgruppen/dbs/team>)

All five are highly regarded scholars in database systems. We are very fortunate that these outstanding scholars are willing to volunteer their valuable time and indispensable expertise for handling manuscripts for the benefit of our community. I am gratified that they have committed to help *TODS* continue to evolve and improve, and I am looking forward to working with them.
