Online First Publication

C. B. Jones¹, D. J. Cooke² and Christiane Notarmarco³

¹Editor-in-Chief

²Associate Editor

³Executive Editor, Corporate Sales & Journal Development, Springer-Verlag London Ltd.

The editors of Formal Aspects of Computing and Springer-Verlag London Ltd are pleased to announce a new service for our authors and readers: **Online First**, the immediate online publication of all accepted papers as soon as the authors have returned the corrected proofs. Whereas the fully electronic versions of Formal Aspects of Computing used to appear at the same time as the print journal, from now on the electronic version of all articles will be available to subscribers via the Internet weeks before the printed version appears.

This means an enormous reduction in publication time. It will no longer be necessary for manuscripts to wait until the “next issue”.

As each paper is ready for publication, it will be published on the Web with its own publication date as follows: “Published online: <date when placed on Springer’s server>”. Each article will receive an international identification code – the “Digital Object Identifier” (DOI), which is registered with the International DOI Foundation and is unique, like the ISBN for books or the ISSN for periodicals.

Contributions published **Online First** are citable by journal title and DOI. The printed version will also have the final page numbers, the DOI and the online publication date.

Furthermore the DOI is linked to the URL (Uniform Resource Location) and the bibliography when the printed issue is released. The DOI is never changed and can be used, for example, to create hyperlinks between **Online First** articles.

Online First articles appear in their final form. Therefore, papers cannot be changed or withdrawn after electronic publication. Any corrections that might be necessary have to be made in an Erratum, which will be hyperlinked to the article.

Each article will be announced in SpringerLink alert, which is a free alerting service. A table of contents showing all papers that have been accepted for publication in Formal Aspects of Computing but not yet printed can be found via the Springer Web page:
