Invited Article Foreword

The Invited Article of this issue is “[Near-Optimal Distributed Triangle Enumeration via Expander Decompositions](#)” by Yi-Jun Chang, Seth Pettie, Thatchaphol Saranurak, and Hengjie Zhang, which won the best paper award at the 38th ACM Symposium on Principles of Distributed Computing (PODC 2019). We want to thank the PODC’19 Program Committee for their help in selecting this invited paper, as well as editor Rachid Guerraoui for handling the paper.

Eva Tardos
